

NELFE Antibody

Rabbit Polyclonal

Antigen Affinity Purified

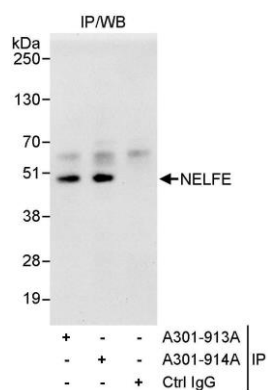

Protein ID NP_002895.3

Catalog No. A301-914A-T

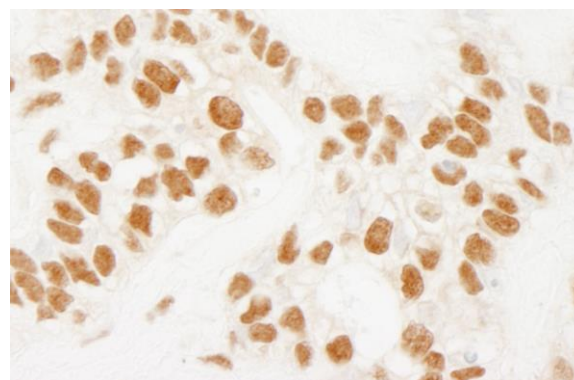

GeneID 7936

APPLICATIONS	IP, IHC
SPECIES REACTIVITY	Human
PRESUMED REACTIVITY	Based on 100% sequence identity, this antibody is predicted to react with Bovine
AMOUNT	10 µl
CONCENTRATION	1000 µg/ml
STORAGE/SHELF LIFE	2 - 8° C / 1 year from date of receipt
PHYSICAL STATE	Liquid
BUFFER	Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09% Sodium Azide
ISOTYPE	IgG
ORIGIN	USA
PRODUCTION PROCEDURES	<p>Antibody was affinity purified using an epitope specific to NELFE immobilized on solid support.</p> <p>The epitope recognized by A301-914A-T maps to a region between residue 330 and 380 of human negative elongation factor polypeptide E using the numbering given in entry NP_002895.3 (GeneID 7936).</p> <p>Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.</p>
APPLICATIONS	<p>Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.</p> <p>Western Blot Not recommended. A301-914A-T has not performed satisfactorily when used for WB of NELFE in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of NELFE.</p> <p>Immunoprecipitation 2 - 5 µg/mg lysate</p> <p>Immunohistochemistry 1:500 - 1:2,000. Epitope retrieval with citrate buffer pH 6.0 is recommended for FFPE tissue sections.</p>
APPLICATION NOTES	Western blot of immunoprecipitates performed using Normal Pig Serum (Cat. No. S100-020), Goat anti-Rabbit Light Chain HRP Conjugate (Cat. No. A120-113P) and 4-20% SDS-PAGE (link to IP-western blot protocol in Additional Info section below).
ADDITIONAL INFO	<p>https://www.bethyl.com/product/A301-914A-T</p> <p>Use the link above to view SDS, a current list of citations, and other product specific information. IP-western blot protocol: https://www.bethyl.com/content/protocol_IP_WB</p>

Detection of human NELFE by western blot of immunoprecipitates. *Samples:* Whole cell lysate (1 mg for IP, 20% of IP loaded) from HeLa cells. *Antibody:* Affinity purified rabbit anti-NELFE antibody A301-914A-T used for IP at 3 $\mu\text{g}/\text{mg}$ lysate. NELFE was also immunoprecipitated by rabbit anti-NELFE antibody A301-913A, which recognizes an upstream epitope. For blotting immunoprecipitated NELFE, A301-914A-T was used at 1 $\mu\text{g}/\text{ml}$. *Detection:* Chemiluminescence with an exposure time of 30 seconds.

Detection of human NELFE by immunohistochemistry. *Samples:* FFPE section of human ovarian carcinoma. *Antibody:* Affinity purified rabbit anti-NELFE (Cat. No. A301-914A-T Lot1) used at a dilution of 1:1,000 (1 $\mu\text{g}/\text{ml}$). *Detection:* DAB.
